Weekly Zika Virus Testing in Mosquitoes by Region^

Updated: October 25, 2017

Region	Total Pools Tested	Total Mosquitoes Tested	Zika Positive Pools	Mosquito Species Tested
Central	0	0	0	<i>no mosquitoes tested</i>
Eastern	2	55	0	<i>Aedes albopictus</i>
Northern	1,288	46,538	0	<i>Aedes albopictus</i>
Northwest	0	0	0	<i>no mosquitoes tested</i>
Southwest	0	0	0	<i>no mosquitoes tested</i>
Total Ae. albopictus tested	1,290	46,593	0	

^This data represents mosquito pool testing that is conducted by three different laboratories including Virginia's Division of Consolidated Laboratory Services (DCLS), the Fairfax County Health Department's Public Health Laboratory, and a laboratory at George Mason University. These tested mosquito pools were collected as part of mosquito surveillance efforts at sites throughout the state either by local mosquito control programs, or by the Virginia Department of Health mosquito surveillance personnel. These results do not represent statewide mosquito surveillance efforts, and are only representative of mosquito activity detected at the surveyed sites. The Division of Environmental Epidemiology (DEE) compiles data received from its partners weekly and produces the above weekly report.
